

## **OUR SERVICE**

### **PHD Assistance (All)**

We offer comprehensive assistance for PhD candidates across all stages of their research journey. Our services include:

- Topic selection and proposal writing.
- Literature review and hypothesis formulation.
- Research design and methodology.
- Data collection and analysis.
- Thesis writing and editing.
- Viva preparation and defense support.

### **Research Paper Writing**

Our expert team assists in crafting high-quality research papers suitable for publication in reputable journals. Services include:

- Identifying relevant research gaps.
- Formulating research questions and hypotheses.
- Conducting thorough literature reviews.
- Designing experiments and surveys.
- Data analysis and interpretation.
- Writing, editing, and formatting the manuscript as per journal guidelines.
- Assistance with standards such as NBA, NAAC, and NIRF.

### **Publication - SCI, Scopus, WoS, UGC Care**

We facilitate the publication of research articles in prestigious journals indexed in SCI, Scopus, Web of Science (WoS), and UGC Care. Services include:

- Journal selection based on the research topic.
- Manuscript preparation and submission.
- Handling reviewer comments and revisions.
- Ensuring compliance with journal submission guidelines.
- Options for paid or unpaid publications.

### **Industrial Internships - Civil / IT / Mech**

We offer industrial internship opportunities exclusively for civil engineering students. Our services include:

- Placement in reputed civil engineering firms.

- Hands-on experience in real-world projects.
- Mentorship from industry experts.
- Skill development in areas such as project management, structural analysis, and environmental engineering.
- Internships available in IT, Mechanical, and Civil sectors.

## **Seminar / Workshops**

Our seminars focus on practical knowledge and hands-on experience. They include:

- Expert-led workshops and training sessions.
- Interactive Q&A sessions.
- Case studies and real-world applications.
- Networking opportunities with industry professionals and academics.
- Practical and theoretical seminars based on syllabus requirements.

## **Sponsored Projects for BE, ME, Diploma**

We provide sponsorship and support for engineering projects at the bachelor's, master's, and diploma levels. Services include:

- Identifying and securing project funding.
- Mentorship and guidance throughout the project lifecycle.
- Access to research facilities and resources.
- Assistance with project documentation and presentation.
- Projects in fields like Embedded Systems, Software Development, Electrical, Civil, Mechanical, and more.

## **Plagiarism Report**

Our plagiarism checking service ensures the originality of academic and research content. Features include:

- Detailed plagiarism reports using advanced software like Turnitin, Urkund, and iThenticate.
- Identification of duplicate content and sources.
- Suggestions for paraphrasing and improving originality.
- Ensuring compliance with academic integrity standards.

## **Patent : -**

We assist researchers and inventors in patenting their innovations in India, the UK, and Germany. Services include:

- Patentability assessment and prior art search.
- Drafting and filing patent applications.
- Handling patent prosecution and office actions.
- Intellectual property rights management and protection.
- Assistance with publication, design, copyright, and startup patents.

## **Industrial Visits - Paid / Unpaid**

We organize paid industrial visits for students and professionals. Highlights include:

- Tours of manufacturing plants and R&D facilities.
- Interaction with industry leaders and experts.
- Exposure to modern technologies and processes.
- Certificates of participation.

## **Government Site Visits with Letters**

We facilitate government site visits, complete with official letters of permission. Services include:

- Arranging visits to government research centers, laboratories, and project sites.
- Obtaining necessary approvals and documentation.
- Guided tours and presentations by government officials.
- Opportunities for collaboration and networking.

## **Speciality :**

- **IEEE Paper Writing:** Specialized assistance for writing and publishing papers in IEEE journals across various engineering disciplines including IT, Electrical, Civil, Automotive, Mechanical, and Production.
- **Journal Publication:** Support for publishing in various formats (paid/unpaid) across reputable platforms such as Scopus, SCI, WoS, UGC Care, Springer, and PubMed.
- **Workshops/Seminars:** Offering paid workshops and seminars that cover both practical and theoretical aspects as per the syllabus requirements.
- **MOU Partners:** Collaborations with colleges and companies to enhance research opportunities and industrial exposure for students.
- **Degree Support:** Assistance with PhD thesis and MTech dissertations, ensuring high academic standards and originality.
